## Senior Full Stack Engineer - C# / .NET

Date: February 10, 2026

Job role	Full Stack Engineer
Department	Provisioning Tools
Working place	Meyreuil - France
Starting Date	ASAP

### Missions

Reporting to the Manager of the Personalization & Provisioning Tools team, you will join a team of full stack developers and contribute to the development of business-critical software tools for provisioning and personalization.

You will be involved throughout the entire application lifecycle, from design to production, and will contribute to the generation of the data required for the deployment of our products.

### Main responsibilities

- Actively contribute to the design and evolution of software and system architectures for provisioning and personalization tools.
- Develop, maintain, and enhance business-critical software solutions, ensuring high levels of quality, robustness, and performance.
- Act as a key technical interface with internal business and technical teams.
- Work closely with the team manager on workload estimations, prioritization, and planning.
- Perform technology watch activities and propose continuous improvement initiatives.

### Requirements

<b>Educational background</b>	Engineering degree in Computer Science or equivalent education.
<b>Experience</b>	5+ years of experience in full stack software development, preferably in an industrial, highly technical, or security-constrained environment.

Electronic versions are uncontrolled unless directly accessed from the QA Document Control system.

Printed version is uncontrolled except when stamped with 'VALID COPY' in red.  
External release of this document may require an NDA.

# Job Offer

## Senior Full Stack Engineer - C# / .NET

<b>Skills</b>	<p>Strong expertise in backend and frontend software development, with a particular focus on C# / .NET technologies.</p> <p>Good knowledge of REST APIs / Web APIs and relational databases (SQL).</p> <p>Experience with version control tools such as Git / GitLab.</p> <p>Strong interest in technologies related to provisioning and personalization, including cryptography, certificate management, PKI, and HSMs.</p>
<b>Others</b>	<p>Technical English skills required.</p> <p>Autonomous, rigorous, analytical mindset, with strong communication skills and the ability to work in cross-functional teams.</p>

### Why Join Us?

- Join a small, passionate, and expert team working on high-impact software solutions.
- Work on technically challenging projects in post-quantum cryptography, secure semiconductors, PKI, and advanced systems.
- Be part of a fast-growing, NASDAQ-listed technology company with strong international visibility.
- Have a direct impact on mission-critical and highly secure products.
- Grow your career in an international, collaborative environment, inspired by high-performance partnerships such as BWT Alpine Formula 1.
- Enjoy flexible working conditions with two days of remote work per week, in a pleasant environment near Aix-en-Provence.
