

Job Offer

Systems & Network Engineer

Date: March 27, 2026

Job role	Systems & Network Engineer
Department	IT
Working place	Meyreuil - France
Starting Date	ASAP

Missions

Looking to lead and evolve IT infrastructure in a demanding, fast-growing technological environment?

Reporting to the IT Director, you will play a key role in managing, securing, and evolving the IT infrastructure. You will be involved in strategic projects within an international context, particularly with the development of a new production site in Spain, in an environment with high security standards (ISO 27001, Common Criteria).

Main responsibilities

- Ensure the availability, performance, and security of the IT infrastructure,
- Administer and enhance system and network environments (Linux/Windows),
- Design, deploy, and secure network architectures (firewalls, segmentation, multi-site environments),
- Provide technical support from Level 1 to Level 3,
- Contribute to the definition and evolution of IT architecture (on-premise and cloud),
- Participate in infrastructure projects (network, data center, high availability, disaster recovery, deployment of new services),
- Implement and maintain monitoring, backup, virtualization, and security solutions,
- Write and maintain technical documentation (procedures, specifications, activity reports),
- Participate in audits and compliance initiatives (ISO 27001, Common Criteria),
- Collaborate with international IT teams and contribute to multi-site projects.

Job Offer

Systems & Network Engineer

Requirements

Educational background	Master's degree in IT (Engineering school, MIAGE or equivalent).
Experience	At least 5 years of experience in systems and network administration.
Skills	Strong expertise in Linux and Windows environments. Solid knowledge of networking, security, and firewalls. Experience with IT architectures (on-premise and cloud). Familiarity with monitoring, security, backup, and virtualization tools. Good understanding of secure and regulated environments (ISO 27001, audits, sensitive industries).
Others	Strong analytical and problem-solving skills with the ability to handle complex technical issues. Autonomous, rigorous, and able to work in demanding environments. Team player with a service-oriented mindset. Experience in an international environment is a plus. Fluent in English; Spanish is highly appreciated.

Why Join Us?

- Join a fast-growing, NASDAQ-listed technology company with strong international exposure.
- Contribute to the development and industrialization of next-generation post-quantum secure semiconductors.
- Work in a high-tech manufacturing environment with cutting-edge semiconductor technologies.
- Be part of a collaborative and innovation-driven culture.
- Enjoy flexible working conditions with two days of remote work per week, in a pleasant environment near Aix-en-Provence.
